Good Morning Anita,

Per our phone conversation this morning, We are currently exploring few options of which one is to amend Rule 74.26- Crude Oil Storage Tank Degassing to include the control of emissions from pipeline cleaning & degassing as well. I will let you know of our findings when we complete our tech assessment. Thanks

**Subject:** Follow up from call on contingency measure

Hi Ali,

John Kelly is out for a few weeks so I just wanted to follow up with you from our June 28 call on a potential contingency measure from the District for the 2008 ozone plan. I think a couple ideas for possible revisions to existing measures were raised on the call and we also talked about a potential commitment letter around the end of August. Just wanted to check in and see if any further discussions between Ventura, CARB, and EPA would be helpful, or if we can help review or provide input on ideas or a draft letter?

Thanks so much and hope you are well!

Anita
